

\*We hired a fabulous lube tech. We can now get you in quickly. Call or text for an appointment. 402-858-7935

\*We've studied ways to reduce wasted time. One thing we do is to write the repair order when you make your appointment. We print all the invoices ahead of time. When you arrive, everything is all laid out. Saves time, reduces confusion. This helps us to produce 5 days of work in 3 days. A 3-day work week helps attract and retain the best techs. Once again, we lead the Industry in new thinking and top quality work. We will have fresh minds working on your car. We do better work.

\*We have equipment to service Hybrid AC systems. Hybrids use electric motors to run the AC compressors. The oil used in regular cars conducts electricity. Don't get fried, call us for service.

\*We are experts at ALL AC systems and can make your car's AC not just cold, but WITT cold.

**Vacation Tips:** If you have kids, you'll only get about 15 summers to take them on vacations. Put it on the calendar and do it this summer.

Protect yourself at rest stops, keep one person with the car, doors locked, and rotate using the restrooms.

Take the keys out of the ignition and lock the doors when pumping gas

Keep your cell phone with you when you're not in the car. There are no more pay phones.

Explore Nebraska. It's a beautiful state. Drive west to Paxton, Nebraska. Have a meal at Ole's Big Game Steakhouse. See the polar bear and more.

Get off the Interstate at Ogallala and continue west on Highway 26 following the Oregon Trail. See Chimney Rock .

Continue to Scottsbluff National Monument. 400 miles for a fun day of travel. Have dinner at Ole's Mexican restaurant in Scottsbluff.

1. T or F—The average used car today is selling for about \$4,000 more than a year ago.
2. T or F—When a car's AC system isn't cooling well, it could cause major damage to the compressor.
3. T or F—Hybrid car's AC system can be damaged by adding "Freon" from the auto parts store
4. T or F—E-15 fuel can be used in any vehicle.

#### Answers to Quiz

1. True. Since there is a huge shortage of new cars, bidding has driven the cost of used cars through the roof. Your best defense is to keep the car you have and do the maintenance to keep it reliable.
2. True. Refrigerant carries the oil that lubricates the compressor. Low refrigerant levels mean less oil circulation. If your AC isn't getting it, have us service it.
3. True. Most hybrids use electric motors to run the compressor. Normal refrigerant oil conducts electricity. This can short out a compressor and cost a lot of money. We have the equipment to safely service hybrids.
4. False. Yes, new cars have been designed to use it, but not all cars can. Check your owner's manual regarding your car. Don't use it in your lawn mower.

#### How Far Can I Go?

Our customers are getting 250,000 miles or more without much ado. We have been keeping cars reliable for under 20 cents a mile. The best car is the one you own that has no payments.

#### Current Mask Policy

We don't care if you have masks in your car. You don't need to wait outside the office or ring the bell to enter. You don't need to wear a mask here. We respect those who do. Thank you.

#### Text 402-858-7935 after hours

We have more staff. We can get you in right away. We do our best to monitor this after hours.
