Answers to Quiz

1. True. Gasoline is formulated seasonally. Summer fuel has additives to prevent vaporizing at high temperatures. Think vapor lock. Winter fuel needs to be able to vaporize at very low temperatures. Think 20 below. Dump the gas can contents into your car. That isn't enough to hurt anything. Then go get fresh non-ethanol gas for winter use. This will prevent repeatedly pulling the starter rope on very cold mornings and cussing to excess when the snow blower doesn't want to start.

Also, if you still have fuel in your car from September, drive the car then buy fresh gas.

2. True. Criminals look for easy opportunities. Gift wrapped packages and stacks of cash on the dash invite crime. An empty interior on a locked car makes it easy

for the thief to move on. They won't break a window trying to find the french fries under the seat.

3. False. The industry recommends wiper blade replacement at 6 months. This will vary according to geographic location. There is no greater safety hazard than worn blades. If you can't see, it doesn't matter if you can stop or steer.

Streaks from worn blades enable ice buildup in snowy conditions. Hard to imagine but it will be here before we know it.

4. False. They render you almost blind in night driving. Clean lenses focus the light where you need it. Fogged lenses not only reduce the amount of light, they spread it all over. We can polish most lenses to look like new.

Clean headlights and new wiper blades are your best safe driving strategies.

Supply chain disruptions.

We have carefully cultivated close relationships with great parts providers. We've still been able to get the parts we need. **Get your car in soon if you'll be traveling. Don't take chances.**

Headlight Polish Special \$99

See clearly at night. Offer ends Feb 28, 2022

Meticulous saves money

We provide very thorough inspections, starting with a road test. My own car had a noise that I considered normal. Turns out it had a worn suspension component. After repairs, my car is quiet again. Stuff creeps up on you gradually. Thorough inspections take time and save bigger repairs.

Used Car Prices Through the Roof

Supply disruptions have caused drastic price increases on used cars. It only makes sense to take care of the car you've got. Our entire mission is to keep your car reliable and *prevent expensive repairs*. Our Annual Maintenance is only 4 cents a mile. Trading every 5 years can run 75 cents a mile.

Examples of Saving on Repairs

Dirty battery cable connections are often overlooked because it's a messy job that doesn't pay. This can shorten battery life, because the battery doesn't get charged properly. That can damage battery cables and finally cause failure of the alternator. Result is nearly \$1,000 over one simple little thing that got ignored.

We do take care of things we don't like because it's the right thing to do. Our customers spend less on car repairs because of our attention to detail.

Cold Weather Quick Tips

Dirty windows fog faster than clean. Clean the inside of your windows if fogging is a problem.

Keep your gas tank above half when possible. Cold weather fronts can come through suddenly making it unpleasant to stand outside pumping gas.

Don't use the window washer to remove frost unless you're parked. It can freeze and you can't see. Bad move.

**We'll be closed from
Christmas to New Year.**

Happy Holidays

You only need service once a year. Call now.

We protect your car and your health

You don't have to get a shot
You don't have to wear a mask

We do everything outside. We don't even let
people in the building. Can't get any safer than that.

7am-5pm Mon Tues and Wed. **Thursdays by appt. 402-434-6961**

We hate waiting in line

Repair orders written and printed before you arrive.

Arrival times spread out so reception is immediate

We don't want you to wait for a shuttle van, then wait for a tour of the city.

We give you a car to drive.

Call us. 402-434-6961

Our service prevents breakdowns

Easy choice
